

Says

Enhanced Security
Reduced Voter Fraud
Increased Accessibility

Does

Many countries have reported decreased voter fraud, such as multiple voting and impersonation.
Biometric systems have been observed to simplify the voter registration process

Thinks

Biometric voting systems can provide a more secure and tamper-resistant method
Biometric systems can speed up the voting process by quickly and accurately confirming the voter's identity

BIOMETRIC SECURITY SYSTEM FOR VOTING PLATFORM

Feels

Biometric data, such as fingerprints, iris scans, or facial recognition, is highly personal and sensitive
The initial cost of implementing biometric voting systems can be substantial
